## Preamble - Catalogue 2026

Dear Customers,

Fresh look - new ideas! Four years after our last major update, we are pleased to present our catalogue in a new design. Among other products, you can look forward to our twisted memo cube - just one of our new products this year: functional, high quality and with that certain something. For over 100 years, Metzger & Mendle has stood for quality products at fair prices, „Made in Germany“ - stability you can rely on. Enjoy discovering our range and thank you for your trust!

Yours faithfully

Dieter Kohler

Wastepaper baskets	18		

## The Company

The company Metzger & Mendle GmbH was founded in Fischach in 1922. Fischach is located about 25 km west of Augsburg in the so-called „Stauden - Naturpark Westliche Wälder“. In its early days horn combs were produced, soon after followed salad servers and egg spoons made of synthetic resin and horn.

Later the range was expanded to include salt and pepper shakers and buttons made of plexiglass. Starting in 1955 some household articles were decorated with hand-painted gentian and edelweiss motifs. Since 1970 Metzger & Mendle GmbH has been part of the Hörauf & Kohler group of companies. Till this point, some of the articles were produced manually.

In 1975 the range was extended to include office and school articles. It all began with the desk boy, which sold over a million copies in 1976.

In 1980, due to strong expansion, the company headquarters were moved from the center of the village to the new building in the industrial district. Production has grown from five injection molding machines in 1970 to nine; there were also printing and packaging machines as well as toolmaking.

In 2009 Metzger & Mendle took over the production programme „plastic office supplies“ of Voss + Sohn GmbH. In autumn 2011 took place the takeover of approx. 30 injection moulding tools from Westo GmbH & Co. plastics technology. Therefore, the M&M assortment has been extended by numerous articles, such as letter trays, magazine holders and note boxes.

In the meantime the office and school articles are produced on 17 injection moulding machines from 50t - 650t. On a floor space of approx. 15.000 m<sup>2</sup> Metzger & Mendle produces in progressive plastics technology. A high shelf warehouse with a modern goods scanning system, as well as our own assembly, commissioning and packaging department round off this spectrum.

## Quality

For over 100 years, all our plastic products have been produced at our production site in Fischach. To ensure our quality, we not only rely on trained staff, but also on comprehensive and multi-level quality assurance, which is intended to ensure that only products of the highest quality level leave our company.

[www.blauer-engel.de/uz30a](http://www.blauer-engel.de/uz30a)  
• Mindestens 80 % Recycling-Kunststoff  
• Begrenzung von Schadstoffen

## Commitement

We have been a qualified training company for many years, offering apprenticeships in both commercial and technical professions, and providing young people with an interesting and secure start to their careers. Currently, we are training industrial clerks as well as plastics and rubber technologists.

Furthermore, we are actively committed to supporting and employing people with disabilities and disadvantaged individuals, which is why we partner with the workshops listed on the side.

## Sustainability

We take our corporate responsibility seriously and are committed to a careful and sustainable treatment of nature. Our machines are cooled with a water cycle from our own well.

Whenever possible, we try to produce with ground material from our own company or bought in, in order to conserve resources. Plastics that are not only recyclable, but have already been recycled themselves, are used for a large part of our products in order to ensure sustainability in the plastics sector.

75% of the plastics used in our own production are recycled (Q1–Q2 2025). At the same time, we ensure that all our products are designed for optimal recyclability at the end of their lifecycle – for example, by avoiding composite plastics whenever possible. In addition, since 2025 we have eliminated polybag packaging for many items, and all remaining polybags are made from 100% recycled material.

## Certificates

For us, environmental protection is more than just a trending topic of recent years. As early as 1995, the Nature series (fig. p.5), was certified with the Blue Angel. Today we are even more concerned with the topic of sustainability, so that our customers are able to buy products with a clear conscience.

Since 2011 we are certified with the La Prima series with the Blue Angel. In 2017 the La Natura series was added, and modified as well as improved in 2022. Our Blue Angel means: Polystyrene made from 100% recycled consumer goods such as electrical and household devices. This post-consumer waste is separated according to the individual materials and recycled. The processing is climate-neutral, the CO<sub>2</sub> emissions are reduced by 90 % in comparison to the production of plastics from oil. The plastics are separated fully automatically or manually, but not chemically. This is why these products carry the Blue Angel eco-label.

Since 2020 our 80g/m<sup>2</sup> paper has been FSC®-certified. During production, materials from FSC-certified forests and/or recycled material as well as material from controlled sources were used. FSC-certified or post-consumer recycled material is either used at least 70% or at least an equivalent amount is used in the production process to produce the labelled goods.
